

PRIMARY TIME CHART

AMIG Systems' Primary Time Chart software package is designed to produce, change and print timetables for your primary school.

Primary Time Chart provides tools to establish classrooms, timetable specialist teachers and check non-contact time allowances. Primary Time Chart makes it easy to set unavailable times for part time teachers. Complete with manual that provides step by step instructions for each task in building your primary school timetable.

Based on Time Chart

Primary Time Chart is based on AMIG Systems' Time Chart—our timetabling software that is widely used in Australian secondary schools and colleges. We have developed Primary Time Chart to remove complexities not needed in primary schools. We have added new features to make it easy to build a primary school timetable.
