

# TIME CHART 6

**AMIG Systems' Time Chart software package is designed to produce, change and print timetables for your secondary school.**

Time Chart provides many powerful tools for resolving clashes in a flexible way. The timetable is shown as a spreadsheet where the screen acts as a movable window on the complete timetable.

Network version included for multiple users with restricted users able to change data. Can be extended with Time Chart Extra for daily changes and Web Time Chart for publishing to your web site.

## Timetable Building

Easy timetable building processes. Use Clash Help to show alternate clash free times. Use Build to copy to multiple empty clash free positions. Use Solve to automatically generate chains of swaps to resolve difficult clash problems.

## Flexible Timetable

Set and name:

- Years
- Days in cycle
- Times for each day
- Time allotments
- Version

## Easy to Use

- Manual with step by step instructions.
- Instant help available for all windows, menu commands and input dialogues.
- Multiple windows to show all aspects of your timetable.
- Context menus for all windows.

## Student Blocking

- Automatic allocation of subjects into blocks
- Blocking for two semesters
- Split large subjects into smaller classes
- Student clash help to resolve clashes
- Balance class sizes
- Students Grouping, Teachers Grouping, Subjects Grouping

## Extensive Reports

- Main timetable
- Class timetables
- Individual Student timetables
- Weekly and daily timetables for students, teachers and rooms
- Class lists and subject lists
- Teacher loads
- Teachers free and Rooms free
- Colour Coded Reports - Block clashes, Teacher Clashes and Room Clashes
