

TIME CHART EXTRA 5

AMIG Systems' TIME CHART EXTRA 5 software package is designed to make daily changes for a school or college timetable and cover needs, such as teachers and rooms, created by those changes.

TIME CHART EXTRA 5 allows you to enter additional staff—including emergency teachers—as well as select who is available for the day and link to an absent teacher. Changes are available for:

- Absent teachers - select one or more periods or full day
- New classes - schedule staff and rooms needed
- Lost classes - enter for a teacher, class or year
- Merge classes—combine two classes together
- Room changes - swaps or unavailable rooms

The work ahead option lets you plan for camps or excursions in advance. All changes can be cancelled, altered, or added to at any stage.

TIME CHART EXTRA 5 adds onto our Time Chart software to make full use of timetable information already entered.

New Features

- Email class information to covering teachers.
- Easy export—copy information from any window, to easily paste into another application.
- Work with all students as in Time Chart. Show subject lists with students from one or more years.
- Keep lost class tally for replacements on another day.
- Print preview on all windows

Covering Changes

- Flexible routine to select from display of available teachers or rooms.
- Covering teachers or rooms can be altered at any time.

Flexible and Easy to use

- Screen display of all teachers available to cover an extra
- Teachers shown in order—those with the lightest teaching load and least extras taken are shown first
- Shows date of last extra, extras already taken, weekly extras taken, teaching load, extras in the last 10 days
- Order can be changed to suit your requirements
- Check for faculty match with subject. Check for match with teacher's preferred time for extra
- Toolbar for easy access to all changes
- Context sensitive help
- Comprehensive record of past extras
- Publish daily timetables to your web site with **Web Time Chart**

ALL THIS FOR ONLY \$795.00*
